

CLARIFICATIONS ON VARIANCES OF MF3 PE SOFTGEL ADVANCE FORMULA APPEARANCE AND CHARACTERISTICS

5 August 2015 – MF3 is proud to have consumers put their trust in us for over 20 years as the pioneer in Swiss formulated nutritional supplements and skincare products. We have a strong sense of responsibility in our manufacturing processes as our commitment in offering quality nutritional supplements to our consumers, is paramount.

Based on the feedback from our GMP approved manufacturing facility, we would like to advise that you may notice variances in the colour and appearance of our MF3 PE Advance Formula Softgel capsules. This is due to the manufacturing process that contains non-active colouring ingredients (caramel; light brown colour or darker brown colour) that may vary from batch to batch. Please note that the variances in colour of the PE Advance Formula softgels do not affect the efficacy and validity of the product within its specified shelf life.

Thank you for your continuous support.
